Foreword

Dear Students,

Solutions of all previous GATE Questions are already available. Every year about 20% of questions will have repetitive nature. However, rest of the questions are from untapped areas (never asked areas) and few from Previous Engineering Services & Civil Services Questions. Keeping this in view, possible questions are prepared in various subjects (chapter wise) along with their hints/solutions. The student is advised to practice the questions systematically so that their chances of getting high score in GATE Exam will increase.

The student is advised to solve the problems without referring to the solutions. The student has to analyze the given question carefully, identify the concept on which the question is framed, recall the relevant equations, find out the desired answer, verify the answer with the final key such as (a), (b), (c), (d), then go through the hints to clarify his answer. This will help to face numerical answer questions better. The student is advised to have a standard text book ready for reference to strengthen the related concepts, if necessary. The student is advised not to write the solution steps in the space around the question. By doing so, he loses an opportunity of effective revision.

As observed in the GATE Exam, number of sets may be possible, being online exams. Hence, don't skip any subject. All are equally important.

It is believed that this book is a Valuable aid to the students appearing for competitive exams like IES, JTO, DRDO, ISRO and Other PSU's. This book can also be used by fresh Teachers in Engineering in improving their Concepts.

With best wishes to all those who wish to go through the following pages.

Y.V. Gopala Krishna Murthy,

Syllabus for Civil Engineering (CE)

Fluid Mechanics and Hydraulic Machines

Fluid Mechanics: Properties of fluids, fluid statics; Continuity, momentum and energy equations and their applications; Potential flow, Laminar and turbulent flow; Flow in pipes, pipe networks; Concept of boundary layer and its growth; Concept of lift and drag.

Hydraulics: Forces on immersed bodies; Flow measurement in channels and pipes; Dimensional analysis and hydraulic similitude; Channel Hydraulics - Energy-depth relationships, specific energy, critical flow, hydraulic jump, uniform flow, gradually varied flow and water surface profiles.

Hydrology

Hydrologic cycle, precipitation, evaporation, evapo-transpiration, watershed, infiltration, unit hydrographs, hydrograph analysis, reservoir capacity, flood estimation and routing, surface run-off models, ground water hydrology - steady state well hydraulics and aquifers; Application of Darcy's Law.

Irrigation Engineering

Types of irrigation systems and methods; Crop water requirements - Duty, delta, evapo-transpiration; Gravity Dams and Spillways; Lined and unlined canals, Design of weirs on permeable foundation; cross drainage structures.

Environmental Engineering

Water and Waste Water Quality and Treatment: Basics of water quality standards – Physical, chemical and biological parameters; Water quality index; Unit processes and operations; Water requirement; Water distribution system; Drinking water treatment.

Sewerage system design, quantity of domestic wastewater, primary and secondary treatment. Effluent discharge standards; Sludge disposal; Reuse of treated sewage for different applications.

Air Pollution: Types of pollutants, their sources and impacts, air pollution control, air quality standards, Air quality Index and limits.

Municipal Solid Wastes: Characteristics, generation, collection and transportation of solid wastes, engineered systems for solid waste management (reuse/ recycle, energy recovery, treatment and disposal).

Geotechnical Engineering

Soil Mechanics: Three-phase system and phase relationships, index properties; Unified and Indian standard soil classification system; Permeability - one dimensional flow, Seepage through soils – two - dimensional flow, flow nets, uplift pressure, piping, capillarity, seepage force; Principle of effective stress and quicksand condition; Compaction of soils; One- dimensional consolidation, time rate of consolidation; Shear Strength, Mohr's circle, effective and total shear strength parameters, Stress-Strain characteristics of clays and sand; Stress paths.

Foundation Engineering: Sub-surface investigations - Drilling bore holes, sampling, plate load test, standard penetration and cone penetration tests; Earth pressure theories - Rankine and Coulomb; Stability of slopes – Finite and infinite slopes, Bishop’s method; Stress distribution in soils – Boussinesq’s theory; Pressure bulbs, Shallow foundations – Terzaghi’s and Meyerhoff’s bearing capacity theories, effect of water table; Combined footing and raft foundation; Contact pressure; Settlement analysis in sands and clays; Deep foundations - dynamic and static formulae, Axial load capacity of piles in sands and clays, pile load test, pile under lateral loading, pile group efficiency, negative skin friction.

Geomatics Engineering

Principles of surveying; Errors and their adjustment; Maps - scale, coordinate system; Distance and angle measurement - Levelling and trigonometric levelling; Traversing and triangulation survey; Total station; Horizontal and vertical curves. Photogrammetry and Remote Sensing - Scale, flying height; Basics of remote sensing and GIS.

Transportation Engineering

Transportation Infrastructure: Geometric design of highways - cross-sectional elements, sight distances, horizontal and vertical alignments. Geometric design of railway Track – Speed and Cant. Concept of airport runway length, calculations and corrections; taxiway and exit taxiway design.

Highway Pavements: Highway materials - desirable properties and tests; Desirable properties of bituminous paving mixes; Design factors for flexible and rigid pavements; Design of flexible and rigid pavement using IRC codes.

Traffic Engineering: Traffic studies on flow and speed, peak hour factor, accident study, statistical analysis of traffic data; Microscopic and macroscopic parameters of traffic flow, fundamental relationships; Traffic signs; Signal design by Webster’s method; Types of intersections; Highway capacity.

CONTENTS

Name of the Subject	Page No.
I. Fluid Mechanics & Hydraulic Machines	01 - 142
1. Properties of Fluids.....	02 - 13
2. Pressure Measurement and Fluid Statics.....	14 - 25
3. Buoyancy and Metacentric Height & Liquids in Relative Equilibrium.....	26 - 37
4. Fluid Kinematics.....	38 - 45
5. Energy Equation and its Applications.....	46 - 55
6. Momentum Equation and its Applications.....	56 - 62
7. Laminar Flow.....	63 - 74
8. Flow Through Pipes.....	75 - 83
9. Elementary Turbulent Flow.....	84 - 89
10. Boundary Layer Theory.....	90 - 100
11. Force on Submerged Bodies.....	101 - 105
12. Open Channel Flow.....	106 - 120
13. Dimensional Analysis.....	121 - 130
14. Hydraulic Machines.....	131 - 142
II. Hydrology	143 - 186
1. Precipitation.....	144 - 146
2. Mean Precipitation Calculation.....	147 - 148
3. Frequency of Point Rainfall & Probability.....	149 - 149
4. Evaporation & Transpiration.....	150 - 155
5. Infiltration.....	156 - 161
6. Runoff.....	162 - 162
7. Hydrograph.....	163 - 171
8. Maximum Flood Estimation.....	172 - 175
9. Flood Routing.....	176 - 178
10. Well Hydraulics.....	179 - 184
11. River Gauging.....	185 - 186
III. Irrigation	187 - 220
1. Water Requirements of Crops.....	188 - 198
2. Methods of Irrigation.....	199 - 200
3. Gravity Dams.....	201 - 204
4. Spillways.....	205 - 205
5. Diversion Head Works.....	206 - 211
6. Design of Unlined Alluvial Canals by Silt Theories.....	212 - 218
7. Water Logging and Drainage.....	219 - 219
8. Quality of Irrigation Water and Sodic Soils.....	220 - 220

IV.	Environmental Engineering	221 - 306
	Water Supply Engineering	
1.	Population Forecasting & Water Demands.....	222 - 223
2.	Sources and Conveyance of Water.....	224 - 226
3.	Quality of Water.....	227 - 235
4.	Plain Sedimentation.....	236 - 240
5.	Coagulation.....	241 - 244
6.	Filtration.....	245 - 250
7.	Disinfection.....	251 - 254
8.	Miscellaneous Water Treatment.....	255 - 257
9.	Distribution System.....	258 - 262
	Waste Water Engineering	
1.	Introduction to Waste Water Engineering and Estimation of DWF & WWF.....	263 - 266
2.	Design of Sewers.....	267 - 271
3.	Characteristics of Sewage.....	272 - 276
4.	Treatment of Sewage.....	277 - 279
5.	Activated Sludge Process.....	280 - 283
6.	Trickling Filters.....	284 - 287
7.	Sludge Digestion.....	288 - 289
8.	Septic Tanks.....	290 - 292
9.	Oxidation Ponds.....	293 - 295
10.	Disposal of Sewage Effluents.....	296 - 299
11.	Solid Waste Management.....	300 - 302
12.	Air Pollution and Control.....	303 - 306
V.	Geotechnical Engineering	307 - 406
1.	Origin of Soils.....	308 - 308
2.	Definitions and Properties of Soils.....	309 - 316
3.	Index Properties of Soils.....	317 - 323
4.	Soil Classification.....	324 - 326
5.	Permeability.....	327 - 332
6.	Effective Stress.....	333 - 338
7.	Seepage Pressure & Critical Hydraulic Gradient.....	339 - 342
8.	Seepage Analysis.....	343 - 346
9.	Stress Distribution	347 - 350
10.	Consolidation.....	351 - 362
11.	Compaction.....	363 - 364
12.	Shear Strength.....	365 - 373
13.	Earth Pressure.....	374 - 381
14.	Stability of Slopes.....	382 - 387
15.	Bearing Capacity.....	388 - 396
16.	Pile Foundation.....	397 - 403
17.	Soil Exploration.....	404 - 406

VI.	Geomatics Engineering (Surveying)	407 - 460
1.	Fundamental Concepts.....	408 - 411
2.	Linear Measurements Including Chain Survey.....	412 - 421
3.	Compass Survey.....	422 - 427
4.	Theodolite Survey.....	428 - 430
5.	Traverse Surveying & Omitted Measurements.....	431 - 436
6.	Levelling	437 - 443
7.	Curves.....	444 - 446
8.	Tachometry.....	447 - 450
9.	Contours.....	451 - 453
10.	Areas and Volumes.....	454 - 456
11.	Plane Table Survey.....	457 - 460
VII.	Transportation Engineering	461 - 536
1.	Highway Development & Planning.....	462 - 464
2.	Highway Alignment and Surveys.....	465 - 465
3.	Highway Geometric Design - Basic Elements.....	466 - 468
4.	Highway Geometric Design - Gradients.....	469 - 471
5.	Highway Geometric Design - Sight Distances.....	472 - 476
6.	Highway Geometric Design - Overtaking Sight Distance (OSD).....	477 - 479
7.	Highway Geometric Design - Horizontal Curves.....	480 - 484
8.	Horizontal Curves (Extra Widening).....	485 - 486
9.	Set Back Distance and Curve Resistance.....	487 - 488
10.	Highway Geometric Design - Transition Curves.....	489 - 492
11.	Highway Geometric Design - Vertical Curves.....	493 - 493
12.	Highway Geometric Design - Valley Curves.....	494 - 495
13.	Highway Materials and Testing.....	496 - 503
14.	Pavement Design.....	504 - 506
15.	Rigid Pavements.....	507 - 512
16.	Traffic Engineering.....	513 - 520
17.	Railway Engineering.....	521 - 532
18.	Airport Engineering.....	533 - 536
